Raising Incident – Severity

Severity	Description
Severity 1 (Critical)	Fault(s) with the entire system, module, or major component , that prevent(s) the user from continuing with his/her testing and there is no acceptable workaround .
Severity 2 (Major)	A significant feature fails to function or is missing. There is a temporary acceptable workaround solution and user can continue with his/her testing on other areas within the system.
Severity 3 (Minor)	<ol style="list-style-type: none">1) A not so significant feature functions incorrectly, does not match documentation, or lacks features than expected based on the use cases. User can continue to test the system and the flow of the user acceptance testing is not impacted.2) Faults that do not affect the functionality of the system, e.g. Terminology, spelling errors. Testing is able to proceed with no interruption.

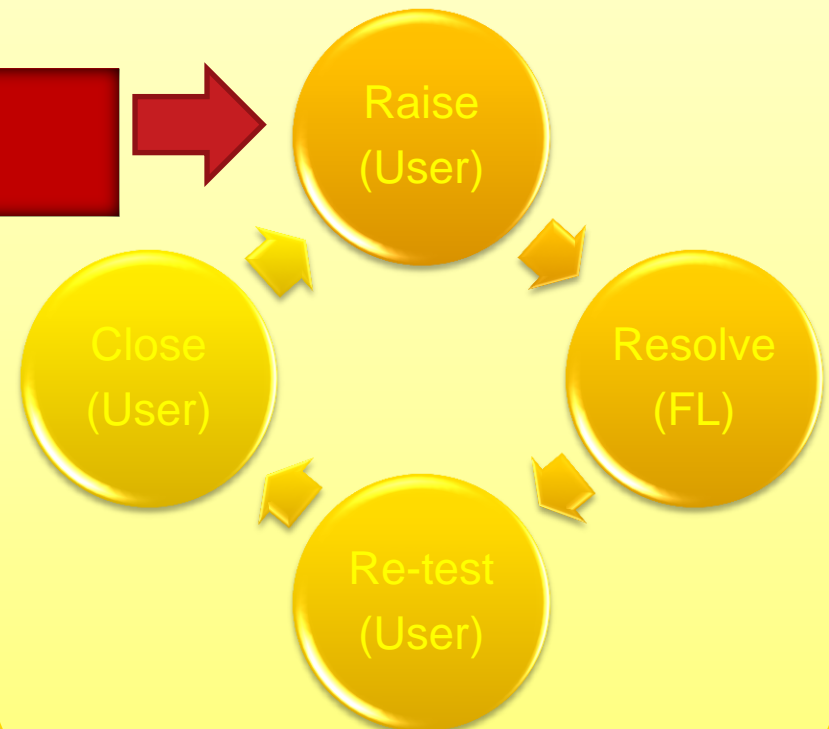

Severity will be reviewed and assigned by PMC

2 Types of Search

1

Simple Search

2

[Advanced Search](#)

Find a specific bug by entering words that describe it. Bugzilla will search bug descriptions and comments for those words and return a list of matching bugs sorted by relevance.

For example, if the bug you are looking for is a browser crash when you go to a secure web site with an embedded Flash animation, you might search for "crash secure SSL flash".
